Sound Design for Storytellers

Who We Are

At **Quetzal Audio**, we transform ideas into emotions — and emotions into sound.

Based in **Mexico City and Bogotá, Colombia**, we craft soundscapes that go beyond enhancing visuals — **they bring stories to life.**

We're not a sound effects factory — **we're storytellers.**

We collaborate with agencies, production companies, and creatives who understand the importance of sound in great storytelling.

Every project is an opportunity to design meaning, rhythm, and atmosphere with intention.

Our work is guided by a deep understanding of how **emotion, identity, and clarity** translate into sound.

Our team is made up of **active industry professionals** engaged in projects both within and beyond Quetzal Audio.

*Whether you're producing a **film**, an **animated series**, or a **branded video**, we help you build an **audible identity** your audience will remember.*

Our Team

Emmanuel Ferron – Sound Designer / Audio Post Expert

Specializes in sound design, dialogue editing, and SFX creation, delivering polished audio for commercials, animation, and branded content.

Pedro Molano – Sound Designer / Music Supervisor

Specializes in curating and integrating music with sound design to align perfectly with each project's narrative and sonic identity.

Joan Baez – Composer / Musician

Creates and performs original music, adding distinctive style and texture to each project.

Our Philosophy

We believe that sound is more than a technical layer — it's a language.

A powerful sound design should **communicate on its own**, even without visuals. Whether it's a fight, a chase, or a tense whisper, the listener should feel the story unfolding through sound.

That's why we design with **intent, emotion, and narrative clarity**.

To us, sound is not just rhythm or text
